Presented by: Peter Zaffina, IT Director of Enterprise Services, Choctaw Nation of Oklahoma

The Tech Tools Making Executives More Productive Today

Peter Zaffina, Choctaw Nation of Oklahoma

Usage Poll

Key take aways

AI is evolving faster than any technology in our lifetime.

Experimentation is key. Just start.

AI is a tool. Discernment and judgment remain the responsibility.

Tools & methods to consider

Open AI

- ChatGPT Project
- ChatGPT Work
- Scheduling chats

Google

- Gems

Microsoft

- Copilot (w/ M365)

Anthrop\c

- Claude Code
- Claude Cowork
- Claude Design

Prompting techniques

Let it interview you.

Tell it what good looks like.

Make it challenge its own work.

Ask the AI to ask you questions first.

Don't force yourself to write the perfect prompt. Give it the objective and say: ***"Before you answer, ask me the questions you need to produce a strong result."*** This turns prompting into a conversation instead of a guessing game.

Give it a role, a goal, and constraints, not just a task.

Weak: *"Review this proposal."*
Better: *"Act as a skeptical CFO. Review this proposal for financial assumptions, hidden costs, implementation risk, and anything that would make you reject it. Be concise and don't invent missing facts."*

Make it critique and improve its own answer.

The first answer should rarely be the last answer.
Try: *"Now stress-test that recommendation. What assumptions are weak? What did you miss? What would a smart critic challenge? Then give me a stronger version."*

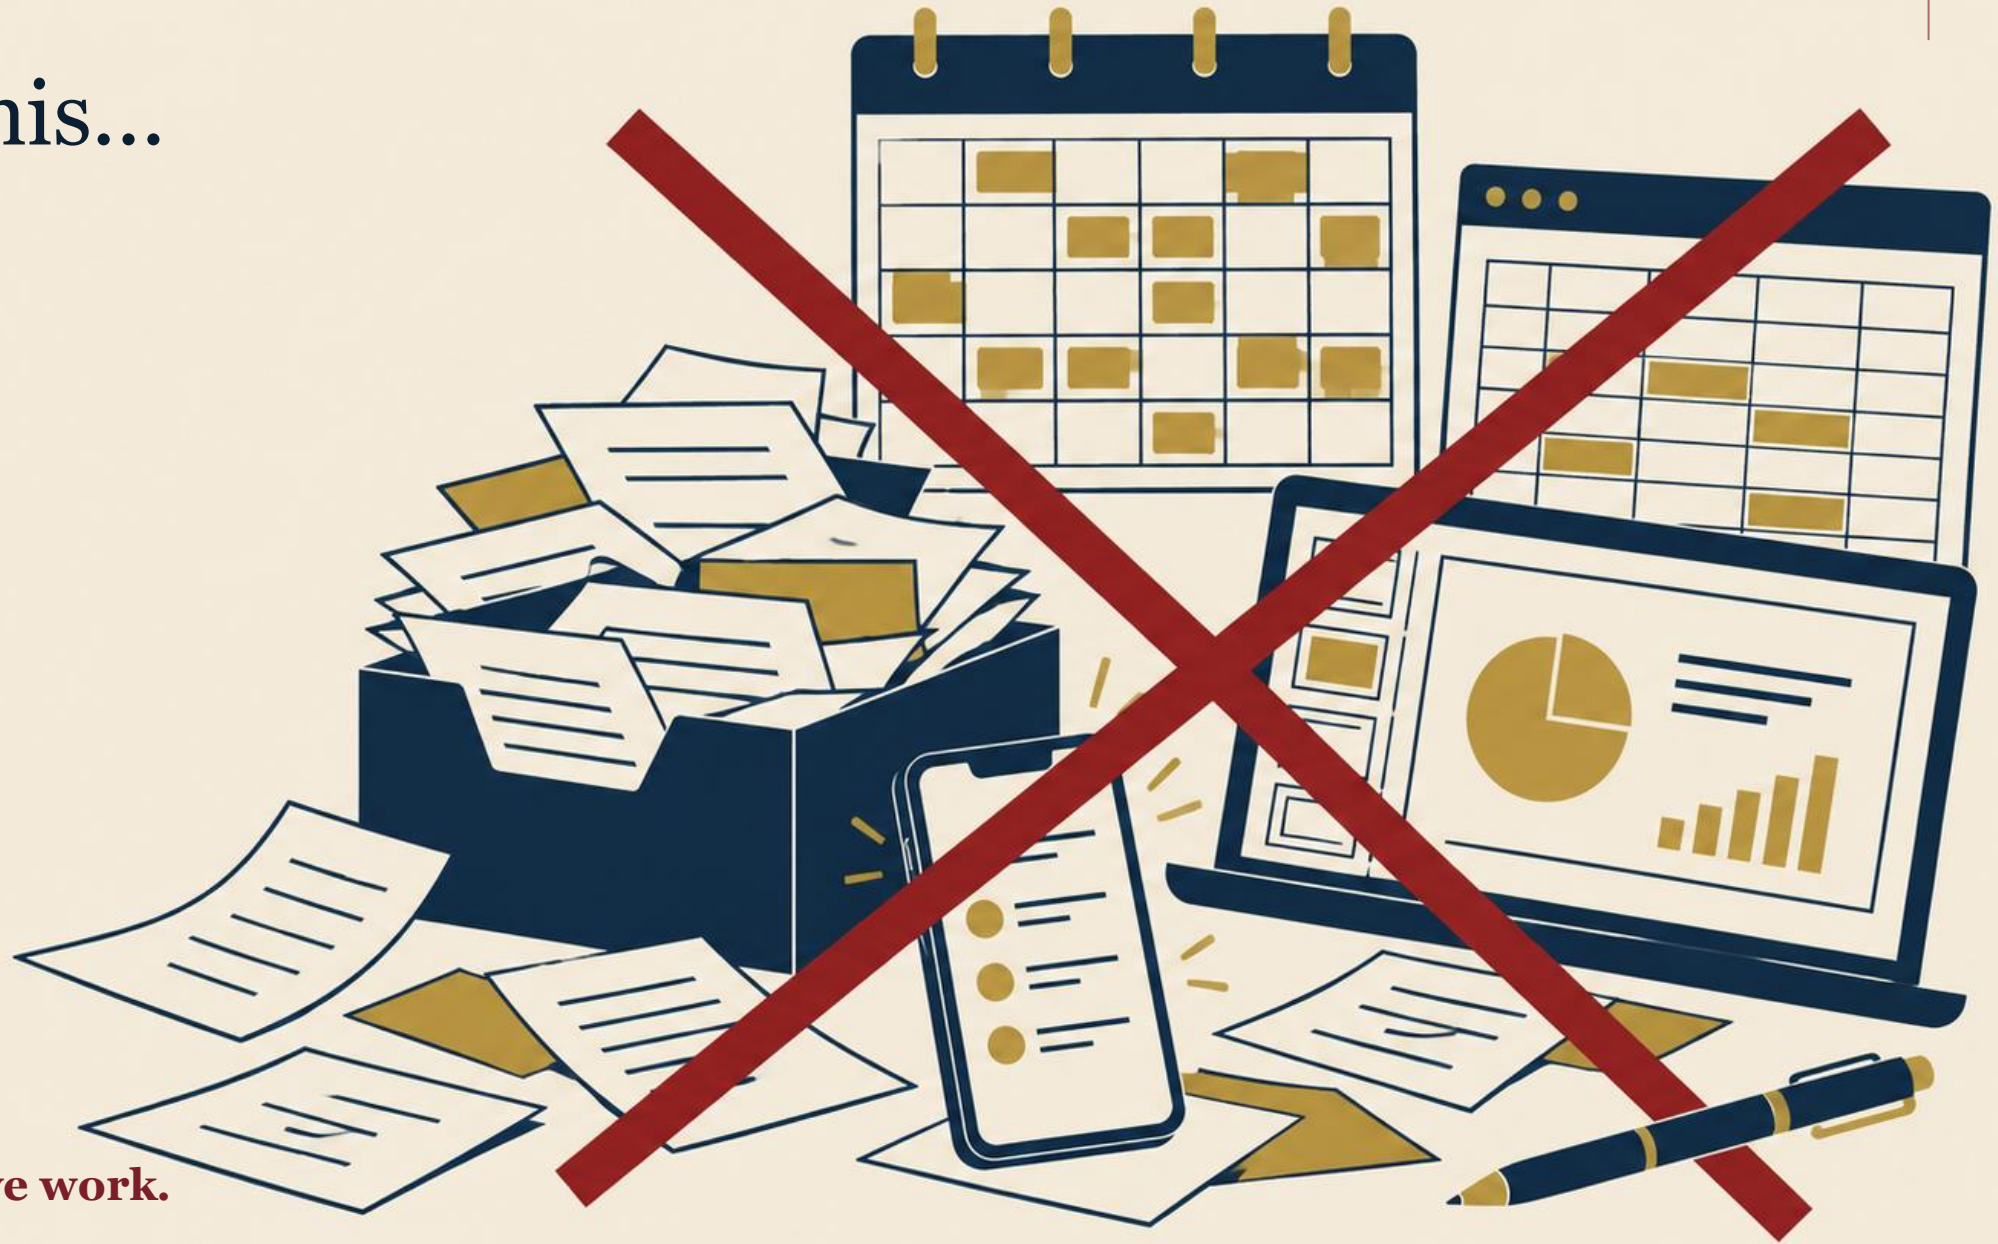

Be careful what you paste into AI. Some proposals, PDFs, and web pages can hide instructions in white text, tiny text, metadata, or other invisible content. That hidden text can try to manipulate the AI's response — a form of **prompt injection**. Treat external documents as untrusted input, especially when the AI is being asked to summarize, recommend, approve, or take action.

The Real Job of an Executive

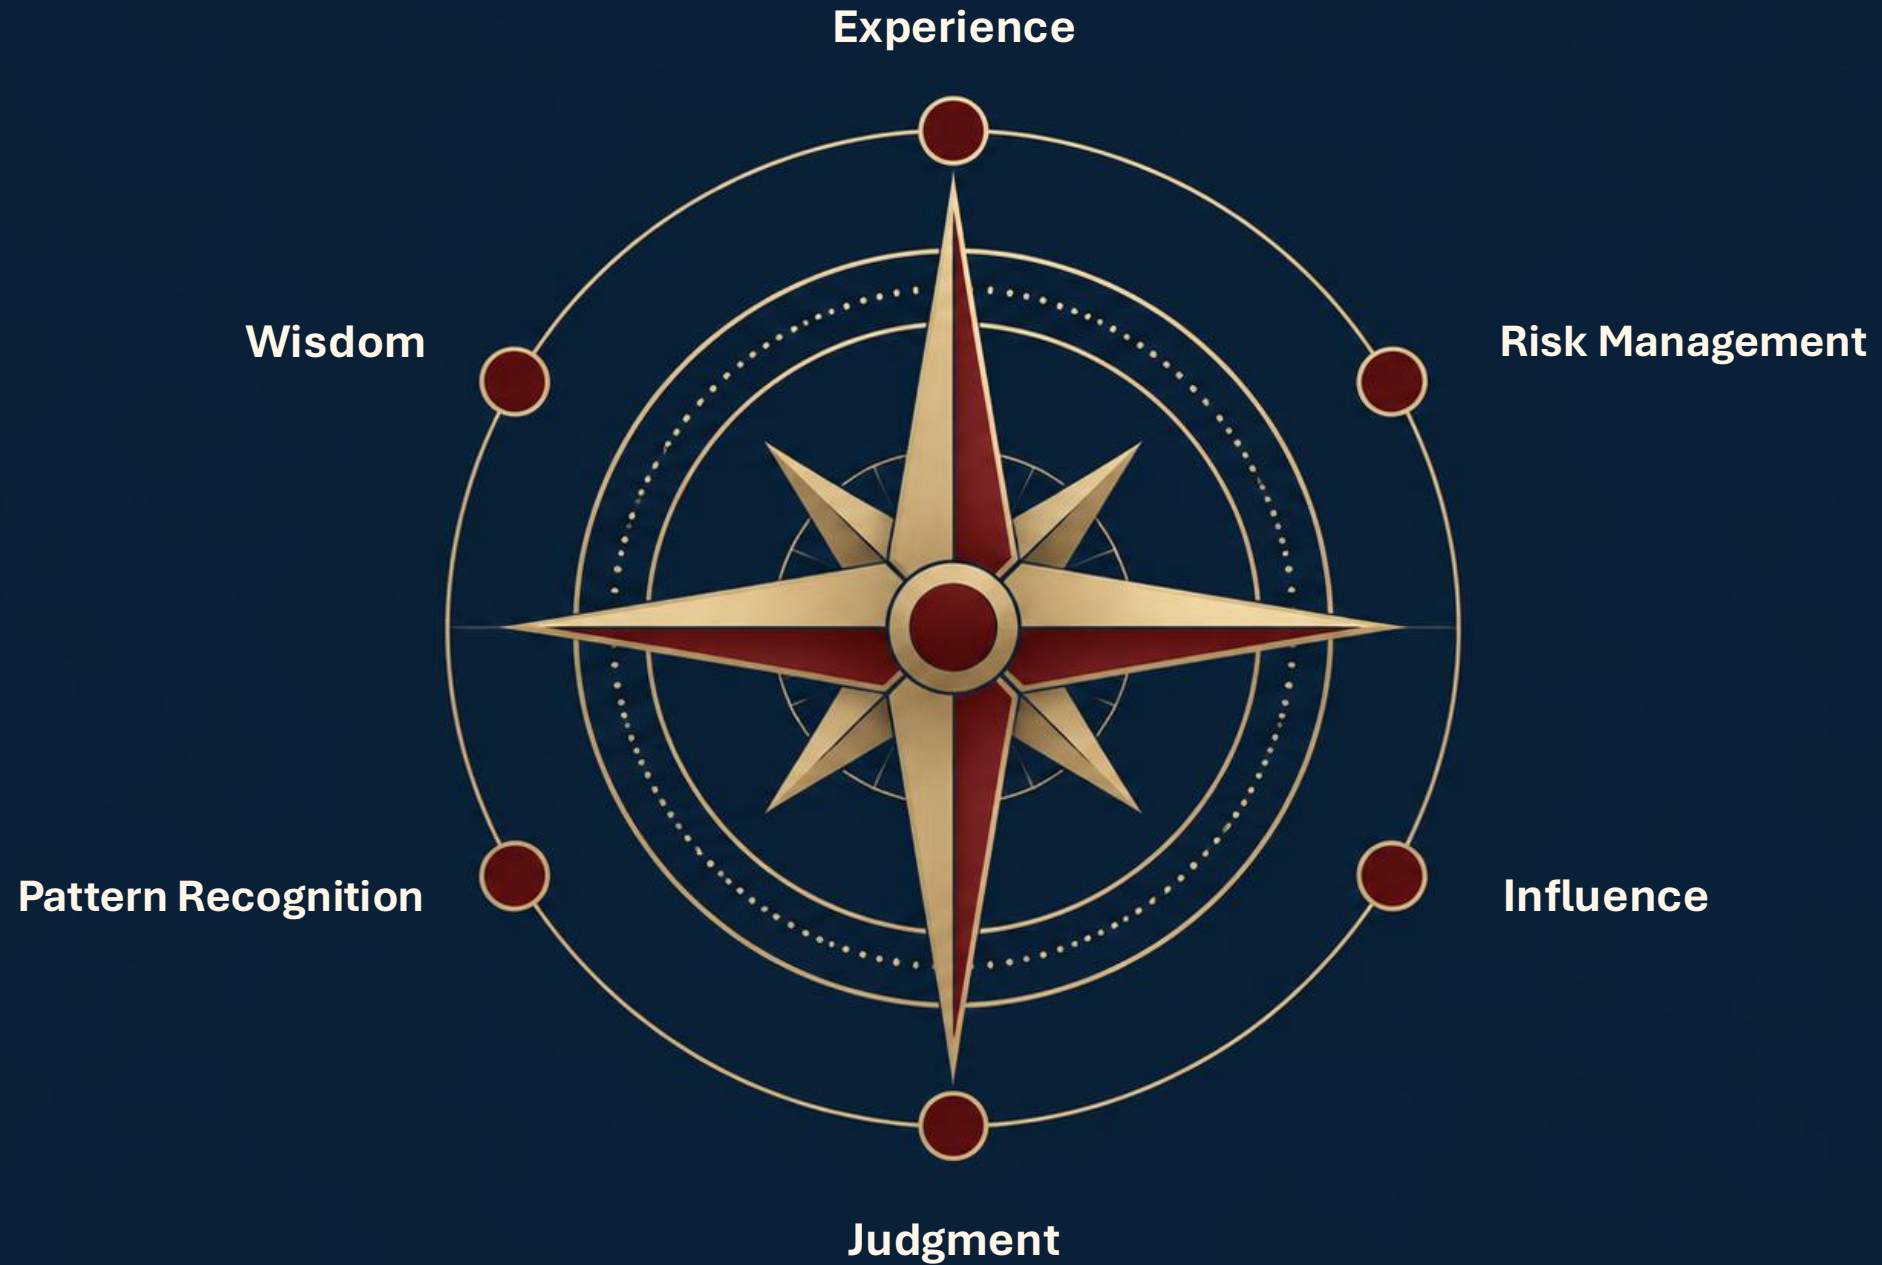

What are executives actually paid to do?

It's Not This...

This isn't executive work.

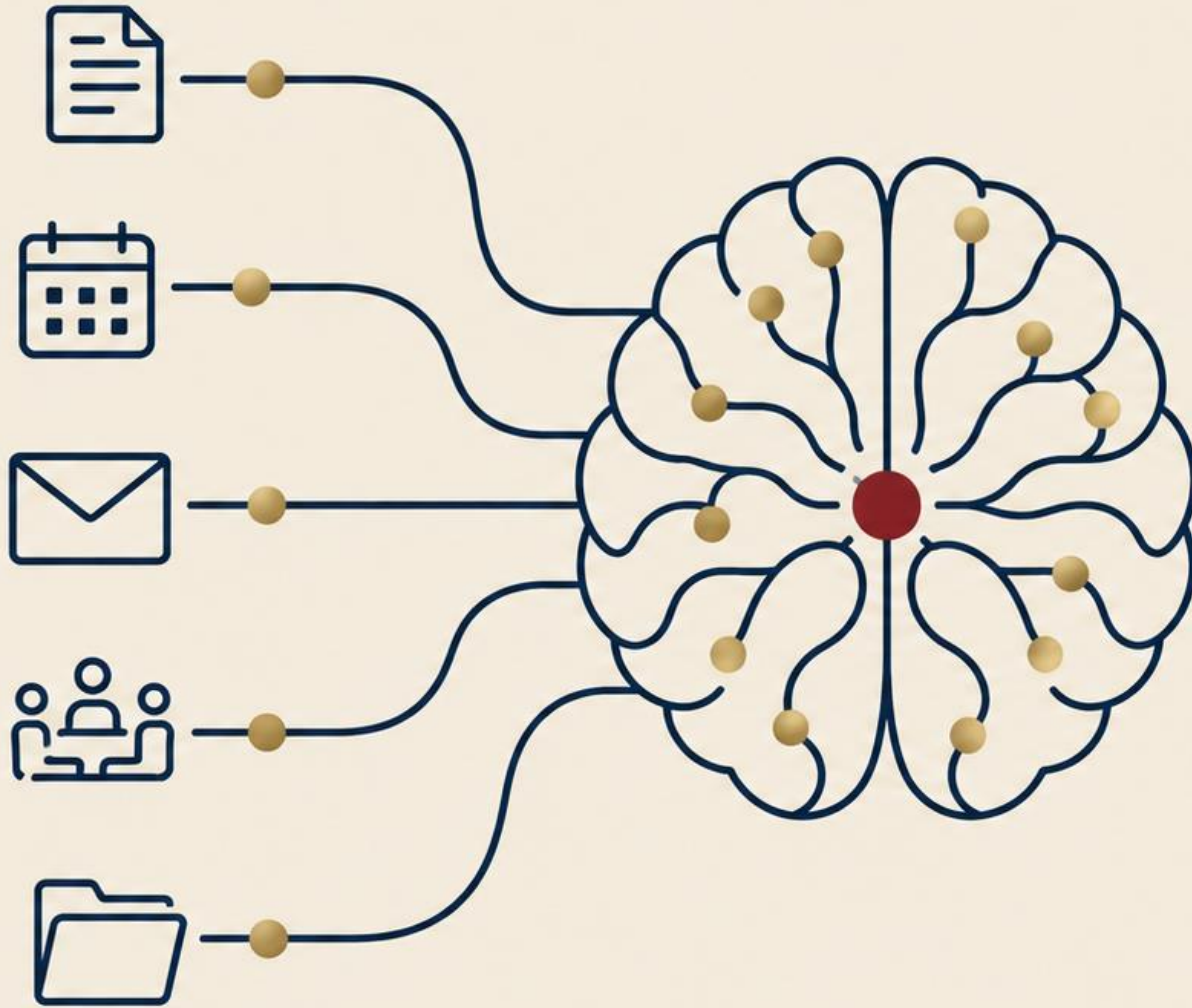

Imagine you had five
trusted advisors...

Every day.
Every meeting.
Every decision.

Your Digital Executive Team

The Memory

**Never forget another
important decision.**

The Challenger

The Advisor

Build a Digital Model of Your Leader

Reviews proposals • Challenges assumptions • Thinks like your stakeholders

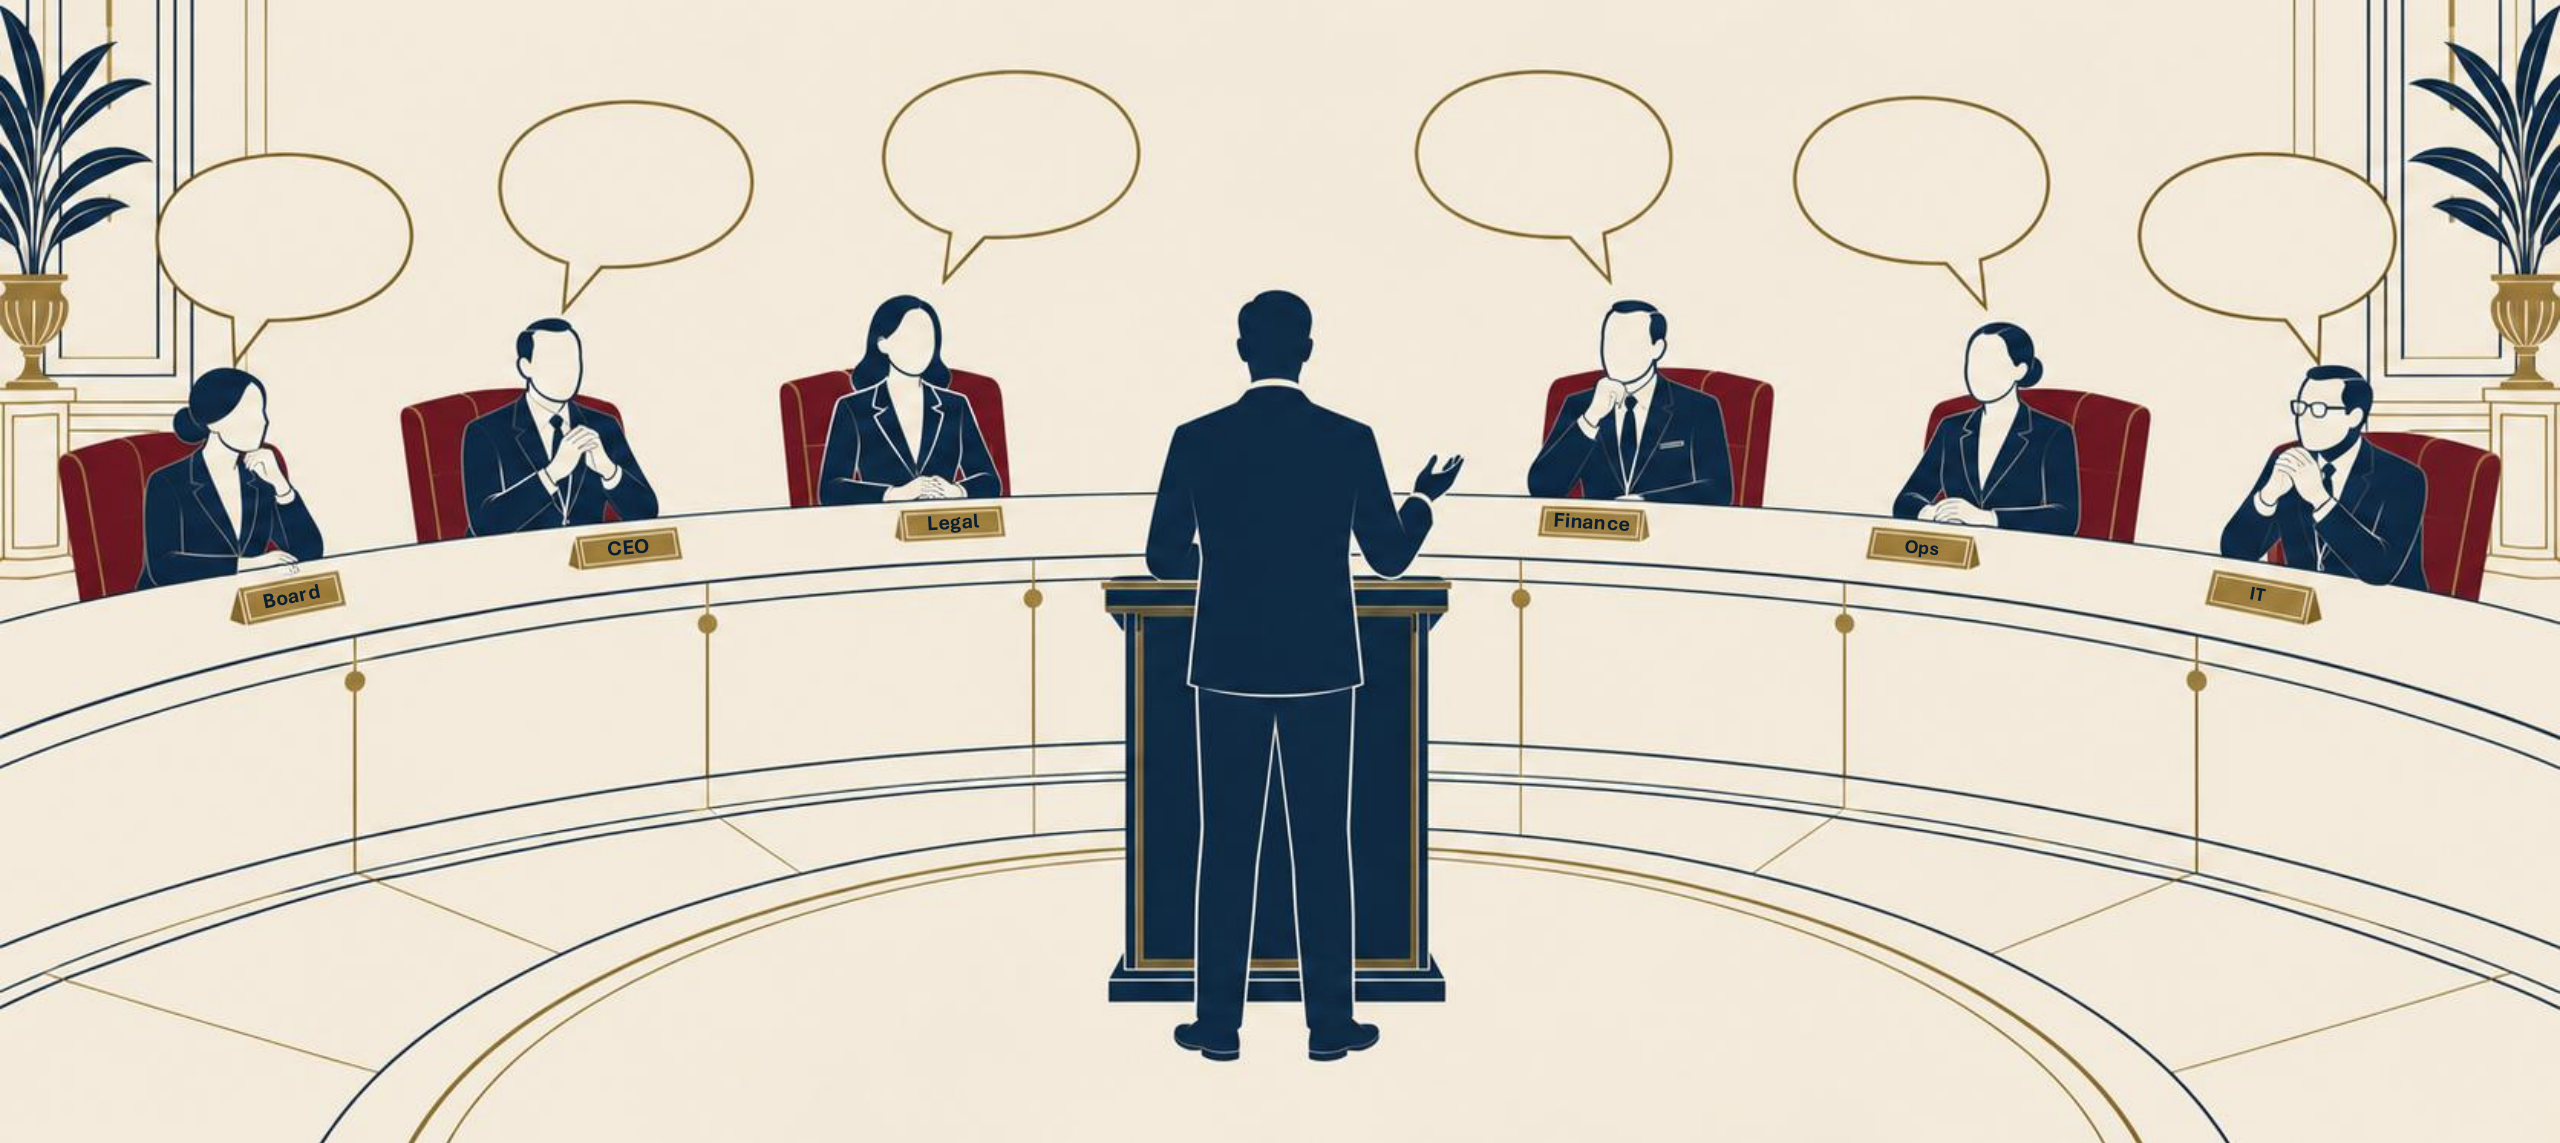

Organizations Don't Run on Org Charts

They run on relationships.

Practice Before It Counts

Build Your Digital Executive Office

Create Project

Load Context

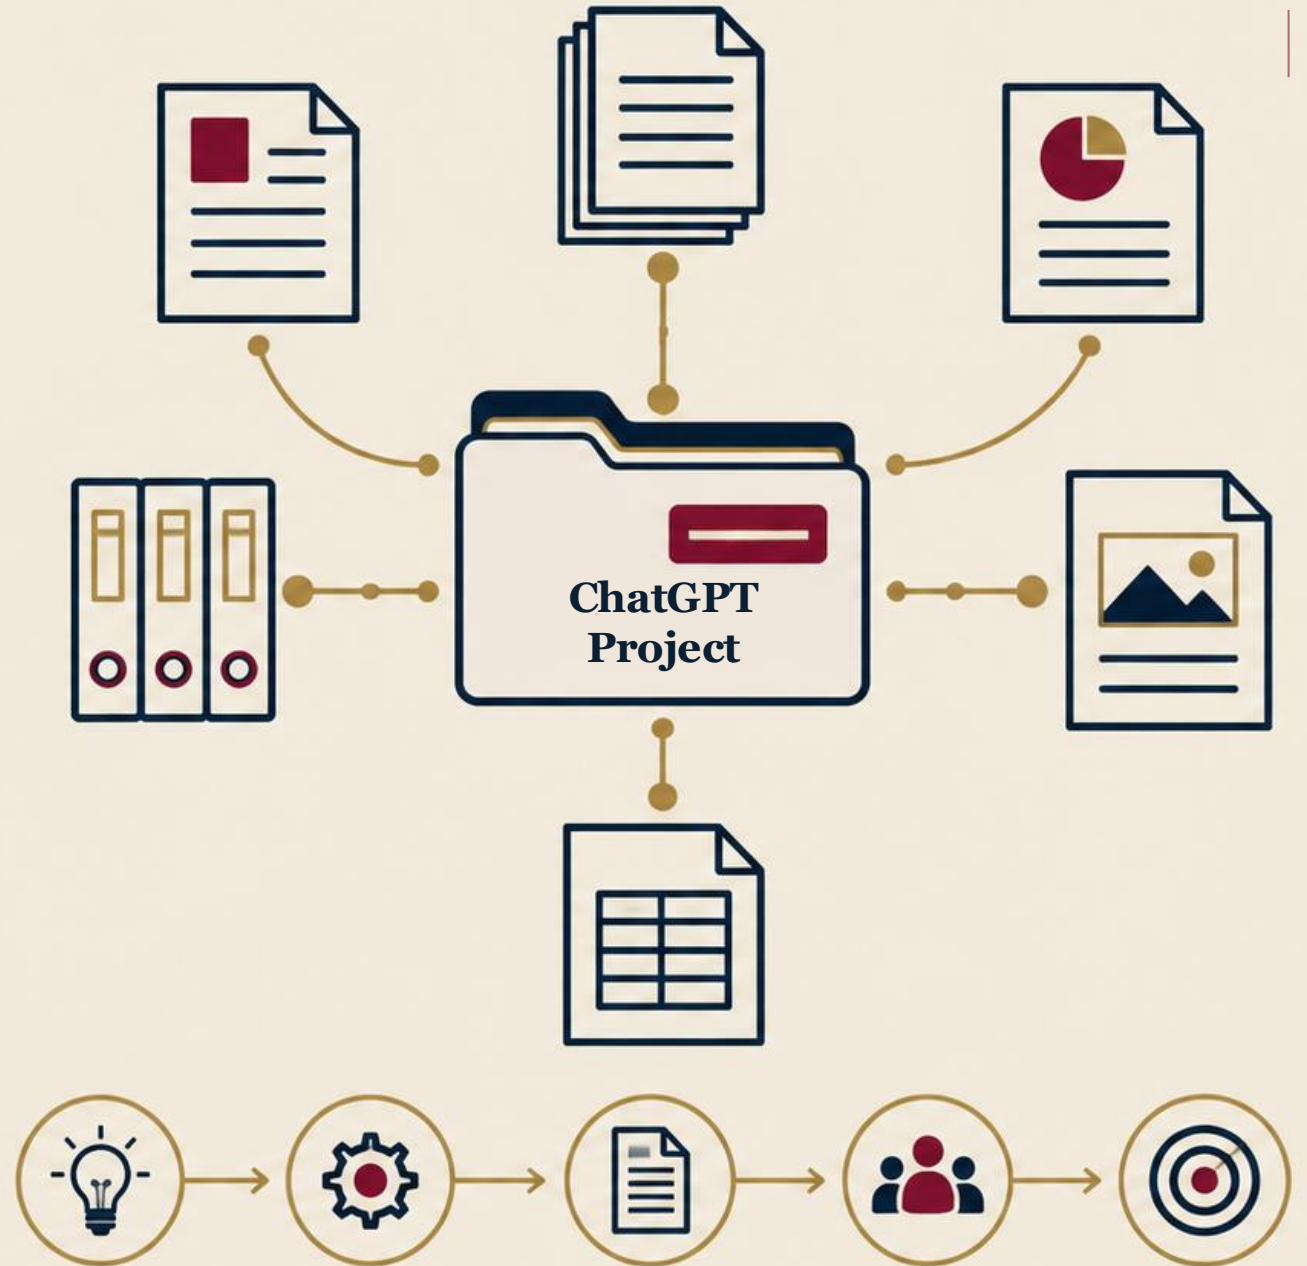

Create Advisors

Capture Knowledge

Improve Every Day

Your Executive Office

Your AI gets smarter every week.

**Technology doesn't replace
executive judgment.**

It scales it.

Build your Digital Executive Team.

Today's Challenge

Can AI think like your Leader?

Live challenge
